Kingdom of the dead. world breaks apart. thunder
spreads across the lands.
Now we've come here to kill you and we won't leave
until you died.
In your blood we kneel emotionless we'll watch your
end.
Now we've come here to kill you and we won't leave
until you died.
Soon you will be king in your kingdom of the
dead...endless torture laments of fear no mourning
your kingdom's near

While the earth is crying mankind's slowly dying we
stand in the ruins of civilization
Mankind's slowly dying we spit on your grave the
kingdom of the dead.
