Overslept
Astonished
Whether you are ever
going to feel this warmth again
which makes us human

Create this bright new world
Cure the cancer of progress
with even more progress
It is the necessary evil
necessary evil

Half asleep you agree
but the money makes you tired
And in your dream the money
adorns your cold driven heart
cold driven heart

But it is not your fault
But it is not your fault
And the next spring
(But it is not your fault)
will never awake
(But it is not your fault)
Sleep well
Sleep well
Sleep well
