Human

Hello, my name is human
And I come from love
Here on earth it's easy
To forget our home

We all remember
From time to time

Bring forth the beauty of your heart
This undying love is who you are

Don't look down
To reasons on the ground
Love will lift you home
To unbelief

We all remember
From time to time

Bring forth the beauty of your heart
This undying love is who you are

Don't look down
You are not alone
Love will lift you home
Love will make us home

Love will lift you out
Love will make us home
