Across the sea, across the sea
That's where your hand was takin' me
Goin' to places that I've never been

I hear your name
Someone's calling your name
I better go now
Someone's calling your name

I thought I saw you in a department store
You turned the corner and it wasn't you
I thought I saw you walkin' on the sidewalk
I blew my horn but you were someone else

I hear your name
Someone's calling your name
I better go now
Someone's calling your name

Open a window, open a window
Walk through the windows
Walkin' through windows
