Solid State Logic
"It's Not Over"

Began with the things you'd say
You never meant to see them through
Just another day
Where I thought I could make it through
Time and time up staged
Get away from all the things you have promised me

How can I fail before I try?
We might never see again

Don't tell me that it's over
It's not over
Where did my life go?
There's nothing
Don't tell me that it's over
It's not over
I will make my life mean something

Hard to believe that I once trusted
All of the things that you would say to me
Can't you percieve that I may of wanted
Something from you that you could not ever be
Nothing

Don't tell me that it's over
It's not over
Where did my life go?
There's nothing
Don't tell me that it's over
It's not over
I will make my life mean something

And maybe we'll fall back in disguise
And maybe we thought this was alright
(Don't you think that's over)
(Don't you think that's over)
(Don't you think that's over)
(Don't you think that's over)

Don't tell me that it's over
It's not over
Where did my life go?

There's nothing
Don't tell me that it's over
It's not over
I will make my life mean something

Don't tell me that it's over
(It's not over)
(Where did my life go? There's nothing)
Don't tell me that it's over
