there's a night that's a good night  
for letting your friends down  
there's never a good night for being cheap  
there ain't never a good night for ripping people off  
but there ain't no law against it  
there has never been a good night for letting you  
friends down  
there has never been a good night for being cheap  
there has never been a good night for ripping people  
off  
but there ain't no law against it  
obviously you don't see no law against it  
obviously you haven't seen nothing wrong with it
