All at once I felt tremendous weight  
As if my chest was going to cave  
The tears that fell left a stain  
The world we know's enslaved  
I know it's hard to hear  
You better heed the words I say  
If we don't act as one you'll see  
The false prophets will betray

[Chorus:]2X  
Our lives should define freedom  
Our lives, to live in our own way  
Our lives must define freedom  
Or will we let them take it away?

Now awake, I face the task ahead  
Will we march into bloodshed?  
The Founding Fathers warned us  
The coming threat, the web of debt conceals

Where are the Sons of Liberty?  
Will the fascists have their way?  
If we don't act as one you'll see  
The false prophets will betray

[Chorus:]2X  
Our lives should define freedom  
Our lives, to live in our own way  
Our lives must define freedom  
Or will we let them take it away?

[Chorus]  
Rise up! To define freedom  
Rise up! To live in your own way  
Rise up! To define freedom  
Or will we let them take it away?

Liberty or tyranny?  
It's your choice to make
