When our love was new
Gave my heart to you
Thought we were one but now we're two
Goodbye farewell so long you fool

Thought that I'd feel blue
All my life I've cried it's true
Now I'm happy to be rid of you
Goodbye farewell so long, you fool

The stars knew exactly what you do to me
Gave me the moon you would do
Might have played a trick on me
Was the fool
Now we're through
Can't get me far enough away from you
No more tears for me
All alone and who cares I am free
No more my heart will pine for you
Goodbye farewell so long you fool

The stars knew exactly what you do to me
Gave me the moon you would do
Might have played a trick on me
Was the fool
Now we're through
Can't get me far enough away from you
No more cares for me
All alone who cares I am free
No more my heart will PINE for you
Goodbye farewell so long
Good luck, adieu, I'm gone
Goodbye farewell so long, you fool
