You seem so far  
Close as we are  
There's too many between us  
You play the host  
Raising a toast  
If we leave, will they notice  
With the next sunrise  
We'll exchange goodbyes  
I just want tonight to last forever  
I want you alone  
So send the others home  
It's no fun if we can't be together

If you run when I say run  
We'll leave everyone none the wise  
Outside all the stars shine bright  
There's no prying eyes  
The night's our disguise

The rest of the world falls away  
Just you and me here and now  
(Take me with you)  
I don't know what else I can say  
Only take me with you  
(Take me with you)

Thoughts keep me warm  
While you are gone  
Play it over and over  
So kiss me again  
And don't let it end  
Leave a memory to hold onto

I'll count every hour down  
Until you are back by my side  
And now where the stars shine bright  
There's no prying eyes  
The night's our disguise

The rest of the world falls away  
Just you and me here and now

(Take me with you)  
I don't know what else I can say  
Only take me with you  
(Take me with you)

The rest of the world falls away  
Just you and me here and now  
(Take me with you)  
I don't know what else I can say  
Take me with you  
(Take me with you)

MIDDLE 8

If you run when I say run  
We'll leave everyone none the wise  
Outside all the stars shine bright  
There's no prying eyes  
The night's our disguise

The rest of the world falls away  
Just you and me here and now  
(Take me with you)  
I don't know what else I can say  
Only take me with you  
(Take me with you)

The rest of the world falls away  
Just you and me here and now  
(Take me with you)  
I don't know what else I can say  
Take me with you  
(Take me with you)

The rest of the world falls away  
Just you and me here and now  
(Take me with you)  
I don't know what else I can say  
Take me with you  
(Take me with you)
