My mind's gone, never coming back
So when it's all said and done
I hope they see me like a legend
Let my name...
Crowded room full of conquer minds
On the rise to the top, my only challenge is follow time
Big dreams, big goals, my future's legit
Driven by the fact I want it back and never will quit
That's before the fain, and front us in the pain
But whatever, cause my way I guarantee I'll be the
same, ah
Or maybe not, cause money change a lot
And bring my name at the very top
Cause I can't be stopped
Bout to kill this summer, grab a seat, sit back and
watch
Transform your whole life like you making...
All a nigga see is green like my name is dot
Plus a want change like my name barac
Always keep my head up like my name was pac
Cause my balls and my words the only thing I got
Niggas wanna envy, and put a nigga down
But every time I feel dead I come back, like kidneys
I want the benjamins, the money, cars and clothes
A private jet that travel all around the fucking globe
Screaming fans, groupie hoes at all my shows
Better life for myself, this what the future holds
And it's not a dream, she my ride or die
She number one in my fucking team
Every single... that we go, always cause a scene
And then at night, she scratch me up like she wolverine
Wise man, understated facts,
Mistakes made when I was young, could never take
them back
No need to stress baby girl
You could just relax, cause I told you I was coming
back.
