Please, open your eyes
You can't continue this play
Please, Break your chains
You've been contaminating your minds
A new age, the torture of
Your sins should be forgotten
A new age
It's time to control yourself
It's time to be free
It's time to ration
Nobody won't help you
You're your destiny
You won't transcend your own misery
If you don't believe in the new age
It's time to wake up (Centuries of lies)
Our dream has finished
It's time to fight, the war is now.
But not with weapons
Use your intelligence (But not against yourself)
Evil and god, Who are they?
Darkness and light,
Which taught you their meanings.
