Water comes and water goes
Where it ends out no one really knows
Water rises, water falls
Where it comes from no one knows for sure
It seeps from every pore

We have seen the rainy fall
But not like this, it's flooding every shore
People come and people go
I can hear their laughter through the door
But no one's keeping score

Oranges on appletrees
Birds that mate with bumblebees
Endless possibilities, one big happy family
Oranges on appletrees for sure

See your face in front of me
You believed what no one else could see
I feel it deep inside of me
Everything we know shall be renewed
And everyone will see, oh yeah

Oranges on appletrees
Birds that mate with bumblebees
Endless possibilities, one big happy family
Oranges on appletrees and more

I used to be the only one
Not now since you have come
'Cause you and I have seen the signs
That's why we're running blind

Oranges on appletrees
Birds that mate with bumblebees
Endless possibilities, one big happy family

Oranges on appletrees
Birds that mate with bumblebees
Endless possibilities, one big happy family
