Will you stay locked in my heart until the end?

Cold heart, dying to melt away -- were wailing these
dirges dust to day

Will you stay here locked in my empty heart until the
end

Gold tears, leading us far away -- were crying these
shadows dusk to day

Will you stay here locked in my empty heart until the
end

My friend, oh my lover

Will you stay in my heart until the end?

My friend, oh my lover

Will you stay in my heart until the end?

We are father, we are mother we are blood

My friend, oh my lover -- we are one
