Phobocide of a fragile mind  
Unable to deal with strife  
Submission to hopelessness  
Questioning where it all went wrong

Over the years degenerate  
Fall deep into absorbing pain

So much damage has been done  
Long for understanding

(With) intimidation the past reveals  
The fragmentation of forgotten wounds  
Resentments never heal  
So much trust misplaced in you

Submerged in black pain

And now we come full circle  
Seething with contempt  
Coarsened by fear  
Undercurrent draws out  
Containment breeds this behaviour  
Penetrating consciousness  
Relapse into primitive  
Callous actions no regrets

So much damage done  
Understanding never comes
