When I spoke with you today
You don't see a way
How our love could survive this night
You don't see it right

1st Chorus:

And I know that it's true
You don't have to cry, I see it in your eyes
And I know what to say
Love will find a way
You and me will stay
So hold on

There are clouds that appear so cold
Maybe that is so
And the rain never seems to end
Baby lets pretend

2nd Chorus:

And you know what is true
We don't have to cry, the sun will soon be by
And you know what to say
Love will find a way
You and me will stay
Love will find a way
So hold on...

Love, it never ends

3rd Chorus:

And we know what is true
We don't have to cry, just look up in the sky
And we know what to say
Love will find a way
You and me will stay
Love will find a way
So hold on...
