You think of me and I think of you
And we are together
You walk with me and I walk with you
And we are some lovers
Do you wanna be my baby
And I will kiss you
Darling I wanna be your baby
And you will kiss me
Yesterday I was alone
Today we are two
Tomorrow we will be three
That is happiness
Come on baby give me your heart
Sleep with me and I'll dream of you

Stay with me and I'll always love you
I want very much to take a place in your heart
When I think that I was sad
And now I feel fine
Baby you're driving me mad
That is happiness
I want you my little girl
I need you more than another
I love you like nobody can
I want very much to take a place in your heart
