Say hello to the night
Lost in the shadows
Say hello to the night
Lost in the loneliness
Say hello to the night
Lost in the shadows
No one knows

I Can't Wait
I can't wait no
When I see little lights
In the shadows
One must hide when the sun gets higher
I don't know what this madness means
Candle light, I don't know where it's coming from
But I keep moving on till the darkest [thought] makes
me want to try these wings yeah, yeah

Chorus

Loneliness pours over you
Emptiness can pull you through
I can't wait for this feeling to free me
Wind blows hard, But it doesn't matter
Cuz when the sun goes down nothing else matters
[?]
I wait outside her window tonight

Chorus

The lost boys
Loneliness pours over you
Emptiness can pull you through
I can't wait for this feeling to free me

Chorus
