I don  
Let the stars shine through  
I don  
All I want to do is live with you

Just like the light of the morning  
After the darkness has gone  
The shadow of my love is falling  
On a place where the sun always shines  
Don

Let the sun shine through  
No, I don  
All I want to do is live with you

Together, our two hearts are strong  
Don

Let the stars shine through  
No, I don  
All I want to do is live with you  
All I want to do is live with you
