I don't feel don't think don't understand
'Cos things ain't going as I planned
I don't cry don't lie don't make a mine
'Cos people scare me all the time

Look me in the eyes and tell me what is going on
Everything will soon be over we will soon be gone

I don't spit don't shit don't use a knife
Don't tell me how to live my life
Little perpetrator get out of my way
I don't understand what's making you stay

Look me in the eyes and tell me what is going on
Everything will soon be over we will soon be gone
I don't wanna spend my life being on the run
Everything will soon be over we will soon be gone

The only thing I wanna do
Is to live my life and live it through
I'll never, ever be in doubt
'Cos that's what life is all about

I know I will get out alive
I won't let anything go by
I'll enjoy my pain my misery
'Cos there's a meaning can't you see

Look me in the eyes and tell me what is going on
Everything will soon be over we will soon be gone
I don't wanna spend my life being on the run
Everything will soon be over we will soon be gone
