

Spacewalk "Moments And Monuments"

Visit "[Moments And Monuments](#)" on MotoLyrics.com

You can't smoke in outer space
The sun is shining directly in my face
Couldn't light my smoke in outer space

I'll see you on the dark side of the moon
If I told you that I would see you soon
I'd be on the dark side of the moon

I will never die
Walking out in space tonight beyond cerulean skies
I will never die

You can't live in outer space
It's bleak and cold and desolate, a really awful place
You wouldn't wanna live in outer space

I've checked and no one lives on Mars
There's probably something out there, out amongst the stars
But not a single soul lives on Mars

I will never die
Walking out in space tonight beyond cerulean skies
I will never die

You can't smoke in outer space
The sun is shining directly in my face
Couldn't light my smoke in outer space

We're all alone out here (all alone out here)
Interplanetary love and interstellar fear
We're all alone out here (all alone out here)

I will never die
Walking out in space tonight beyond cerulean skies
I will never die
