

Dean Martin "A Winter Romance"

Visit "[A Winter Romance](#)" on [MotoLyrics.com](#)

I never will forget the station where we met
You dropped your skis, a happy circumstance
No one would have guessed we had started
Started a winter romance

And all the way to Maine, on that enchanted train
The passing scenery didn't get a glance
We held hands completely, light hearted
Off to a winter romance

We danced that night, by candle light
The world was white with snow
The way we felt, we never felt
The snow could melt and go

But though the snow is gone, the romance lingers on
And those who said it didn't stand a chance
Will know when they see us together
That love's not controlled by the weather
And all of our summers, we'll have our winter romance

Though the snow is gone, the romance lingers on
And those who said it didn't stand a chance
Will know when they see us together
That love's not controlled by the weather
And all of our summers, we'll have our winter romance
