We're told what's going on in a roundabout way  
We take in everything they have to say  
We've got to believe 'cos there's less complications  
Knowing what's wrong so we can accept dictations

Distorted truth on the TV  
It's for the good of you and me  
Distorted truth turn a blind eye  
On what you believe, it's do and don't die

Do you believe what you read in the papers  
Journalistic distortions and evil red papers  
No place for us in this dishonest system  
Do what we're told, don't have to listen
