

Spectacular "Lonely Love Song"

Visit "[Lonely Love Song](#)" on MotoLyrics.com

I hear that song and I can still picture us
Not sure where we went wrong, maybe love isn't always
enough
I'm missing you, that's all I know, are we better off this
way? Yeah
I'm listening to the radio and I see your face

What's a lonely love song? Something sad but true
Words and melodies that keep reminding me of you
What's a lonely love song? It's just a long goodbye
Voices on the radio make me wonder where you are
tonight

The love yeah was gone, I tried to convince myself
But I hear that song yeah, oh and I'm not doing too well
If I could start all over again I'd never let you go
Every time I try to forget it comes on the radio

What's a lonely love song? Something sad but true
All the words and melodies that keep reminding me of
you, oh
What's a lonely love song? It's just a long goodbye
Voices on the radio make me wonder where you are
tonight

I tried to move on but I don't know how to
I tried to act strong, it's no use
Something's always there to remind me
A photograph that takes me back
Overcome by all the memories that I still have
If we just had a second chance

What's a lonely love song? Something sad but true,
yeah
It's just the words and melodies that keep reminding
me of you
What's a lonely love song? It's just a long goodbye
Voices on the radio make me wonder where you are
tonight, ooh
