Visit "[Lonley Love Song](#)" on MotoLyrics.com

I hear, that song, and I could still picture us

Not sure where we went wrong

Baby love isn't always enough

I'm missing you, that's all I know

Are we better off this way?

Yaa

I'm listening to the radio, and I see your face

Once a lonely love song

But somethings never true... yaaa

Words and melodies that keep reminding me of you

Once a lonely love song

Is just a long goodbye

Voices on the radio make me wonder where you are...
tonight

The love was gone

I tried to convince myself

But I hear that song

Ohhh and I'm not doing to well

If I could start all over again

I would never let you go

Everytime I try to forget

It comes on the radio
Once a lonely love song
But somethings never true... ohh noo
Words and melodies that keep reminding me of you
Once a lonely love song
Is just a long goodbye
Voices on the radio make me wonder where you are...
tonight
I tried to move on, but I don't know how to
I tried to act strong
It's no use
Somethings always there to remind me
A photograph that takes me back
Overcome by all the memories that I still have
If we just got a second choice
Once a lonely love song
But somethings never true... yaaa
Words and melodies that keep reminding me of you
Once a lonely love song
Is just a long goodbye
Voices on the radio make me wonder where you are...
tonight
