Time and again
time was your only friend
taught you to fly
stars in your eyes
just seem to make you cry
as they fall and they rise

And when you see
pictures in black and white

Maybe
there's colour all around you
maybe
you'll open up your eyes

Blood on your lips
drips from your fingertips
you don't see a thing
the tears in your eyes
don't even make you cry
they're just alibis

Maybe
there's colour all around you
maybe
you'll open up your eyes
