Hands across the table  
Before we go to war  
Nothing's really stable  
No one's keeping score

The past stretches behind me  
From which I often run  
I finally let it find me  
Now that I've got a gun

Chorus:  
It don't make it right  
Just 'cause no one cares  
A long list of letdowns  
Too many nowheres  
Through these eyes  
There is no end in sight  
Burn out the bright side  
But it don't make it right

The ass that you've kissing  
The one that holds you down  
Is the one that you've been kicking  
With two feet on the ground

Chorus:  
It don't make it right  
Just 'cause no one cares  
A long list of letdowns  
Too many nowheres  
Through these eyes  
There is no end in sight  
Burn out the bright side  
But don't make it right
