"Say It Loud"

Visit "[Say It Loud](#)" on MotoLyrics.com

Don't feel like following
The latest man-made law?
Fill all requirements
And get a window in your wall
People'll tell you anything
As long as they think you believe
Most aren't worth the listen
And the rest never seem to leave

Your average conversation
Is two people waiting to talk
Nobody really sees anything
But they talk and talk and talk...

Chorus:
There's something on your mind?
There's no need to whisper
You've got something to say?
Say it loud

Pain can lead to silence
And fear can paralyze
But if you think that you're a victim
Try volume on for size
'cause everyone has an opinion
But not the same as yours
You wanna get your message out
You gotta make yourself be heard

Chorus:
Got some evil thoughts?
You Don't need to hide it
You've got something to say?
Say it loud
