Said you'd always be my friend  
Never let me down again  
Well you did 'cause baby it's over  
I'm not about to play your game  
I don't want you to feel the pain, the way I did  
But that doesn't matter

'Cause it didn't take long, for it all to happen  
And it didn't take long, for our love to change  
'Cause it didn't take long, for it all to happen  
And it didn't take long, for our love to break

About a hundred times we try,  
So go and cry a little more  
Save your tears  
For some other lover  
Try and lay your guilt on me  
I wish you'd finally try and see  
You were the one  
Who killed all our chances

'Cause it didn't take long, for it all to happen  
And it didn't take long, for our love to change  
'Cause it didn't take long, for it all to happen  
And it didn't take long, for our love to break

'Cause it didn't take long, for it all to happen  
And it didn't take long, for our love to change  
You know it didn't take long, for it all to happen  
And it didn't take long, for our love to break
