When I return to ashes  
Then the comet rips the sky  
And holy man of the mountain falls  
Then you all must die

To eternal sleep I sink now  
Creating sorrow on all shores  
Turning men against their brothers  
Till man exist no more

Till man exist no more

When there's left no ruler  
All hell will then break loose  
You people cannot survive  
Now you all have to choose

Whether you all follow me now  
Or you slowly die in here  
Fly with me beyond the stars  
Just take my hand, have no fear

Just take my hand, have no fear

No no no
