Won't back down,
I really can't turn around
There's no stopping now
No stopping now
I won't quit

Its funny how we communicate
With words on paper and rhythm
Time is lending a hand to fate
So slow down, slow down then please
Don't ask me why I'm here just believe it

No I won't back down
I really can't turn around
There's no stopping now
No stopping now
I won't quit on you

And I can't be sure of myself when I'm taking all the
chances
Are you counting imperfections
Are you holding out for someone else to hold on to
Are you
Are you

Up the stairs with the lights down low
Are you on somebody else's mind tonight
You feel so right to me
I can't be held accountable
My heart is unpredictable

[Chorus]

And I'm not quite sure of anything anymore
And please don't let me down, and please just show
me how to live without you
