Euphoria

Euphoria

You count the seconds till you're on your own
A force of nature will break you down like a young heart
in the cold
Rapture dies when the river ends
The mission lives but the dream is dead
And we drift again

Euphoria

You count the moments as they're passing by
We're way too young to let things slide
And we're way too old to try
Heavy sky when the ride begins
You close your eyes as the rain sets in

Euphoria

Euphoria

Everyone else is gone but I'm still here
Everyone else is gone but I'm still here (Euphoria)
Everyone else is gone but I'm still here
Everyone else is gone but we still feel

Euphoria
