

Split Fifty **"Burn"**

Visit "[Burn](#)" on MotoLyrics.com

So long every man, the light burns the world again
All is lost in space, no one has a place
If you knew that it would end
If they knew that it would end

We're all gonna burn alive
We're gonna burn alive
We're gonna see the light
The light is gonna take our lives
They're gonna push it now
They're gonna launch it now
We're gonna see the end
The end is gonna take us down

On the other side of the globe
There's nothing wrong without American probes

Twenty years of night
Still no hope in sight
Who counts all the cash
Underneath the ash
