(Hamilton, Irvin, Woolbright, Hogan)

You can't see what I see  
Cause you're so damn angry  
You don't know where you are going  
Soon you'll be sorry

You use us and abuse us  
Criticize our conscious  
Run away, you're a scared child  
Always throwing a fuss

Faces of a foolish man  
Faces of a foolish man  
It's really hard to understand  
The many faces.... of a foolish man  
man?

Waking up in the dark  
With voices that don't exist  
You hurt not to give in  
( But you just can't resist )

And now you're starting to see  
You'll find the blame in one place  
When you point your finger  
Point it right at your face

Follow and follow, you're a step behind  
So close to losing your mind  
Running and running - at a backward pace  
But you can't hide from your foolish face

Faces of a foolish man  
Faces of a foolish man  
It's so hard just to understand  
The many faces - of a foolish man
