

Death

"Altering the Future"

Visit "[Altering the Future](#)" on MotoLyrics.com

Creating a life only to destroy
Which is the best to be dead or alive?
Saved from a life of the unemployed
Where crime is the only way to survive
Born to be thrown in the trash to rot
Maybe a chance but maybe not
The one who is with child, it's their choice to make

To exist in this world may be a mistake
Right or wrong, whose choice will it be?
Death and life taken so easily

Execution, for those who deserve it
Abortion, when it is needed
Controlling our existence with every life we take
Look into the future to prepare us for our fate
The giving and taking of life will always be
Altering the future
Life for a life should remain the rule
The innocent victim that is what's cruel
Look to the past is what we should do
When justice was done and justice was true
An easy way out is what they create
Using our laws to help their escape
People are stupid enough to believe them

Claiming insane is the way to freedom
Death and life taken so easily
Right or wrong, whose choice will it be?

Abortion, when it is needed
Execution, for those who deserve it
The giving and taking of life will always be
