

Death "Low Life"

Visit "[Low Life](#)" on MotoLyrics.com

Those who are a waste of life
Use up air that others could breathe
Human leaches all around
Superior is what they believe

Fake is a word you represent
Your existence on earth I resent
At the cost of others you get by
Each word that you speak is a lie

Low life
That's all you'll ever be
Lies in effect
That's what you like to see

Hiding behind material values
That help cover up your weakness
Never to change, always to look
For an easy way out of life

A pathetic excuse for a human being

Nothing to back you up
Never giving second thought
Thinking you fool the world
Into seeing something you are not

Fake is a word you represent
Your existence on earth I resent
At the cost of others you get by
Each word that you speak is a lie

Low life
That's all you'll ever be
Lies in effect
That's what you like to see
