all of my own free will.its not some mindless thrill.ive
got my head on straight,and i aint gonna wait for
mindless threat,an intent to injure,an intent to hurt that
i dont sweat.sticks & stones.come on and break my
bones.why do you even try?youve burned all your time
and all your bridges too,and all the love,you fuck.you
can silence some of the people some of the time,but
you cant control thrie minds.you can staple my
mouth,you can gouge my eyes.making a fist can never
take away this.you can knock my teeht out yon and your
little boy scouts,making a fist will never take away
this.sticks & stones.come on and break my
bones.youve burned all the time and love you fuck.
