Can't be a better time
To put love in the spotlight
Last month has passed
And I feel that this is my last chance
To shape my love into words or speech to you
And to say, "At least I said I was thinking of you"

You're in a far, far place
keeping a steady pace
Still got a lot to say
Still a cross-country away

Try to keep the letters in motion
Distance has its consequence
Is it really true
Time apart makes the heart grow fonder?
Wishful thinking might have to get me through
I wanna feel the beat of your heart someday soon

You're in a far, far place
keeping a steady pace
Still got a lot to say
Still a cross-country away

Wish you were in my arms tonight
You're living the east-coast life
And it's cold at night
Wish you were in my arms tonight
It's lonely here on this side
Oh western

Sometimes I wish
I never stared into your eyes
Which caused--which caused you to replay
"Makes it tough to just say goodbye"

I'm over here
She's over there
And still there remains lots of care
I'm just counting the days to
When I can see you again

You're in a far, far place
keeping a steady pace
Still got a lot to say
Still a cross-country away
Try to keep the letters in motion
Wish you were in my arms tonight
You're living the east-coast life
And it's cold at night
Wish you were in my arms tonight
It's lonely here on this side
Oh western love, goodbye

Pacific standard
Pacific standard time
You're still a cross-country away
Pacific standard
Pacific standard time
You're still a cross-country away
Wish you were in my arms tonight
you're living the east-coast life
And it's cold at night
Wish you were in my arms tonight
you're living the east-coast life
And it's cold at night
Wish you were
Wish you were tonight
Wish you were
Wish you were tonight
