

## Deathrow "Suicide Arena"

Visit "[Suicide Arena](#)" on [MotoLyrics.com](#)

Walk through the streets  
See what we've done  
To the world  
Children are walking with guns in their hands  
News day by day  
Reports about death and pain  
We just watch  
And don't understand the reasons of war  
Intrigue and pain  
Love and hate  
That we see on TV  
Idols of evil showing us the way  
Blind we imitate and don't see  
How we became what we are  
Evil Bad and Mad

Help before, before we destroy, before we die  
Help we need, we need something that will help us out

Of this crazy evil

World we live in  
Battle field with human corpses  
That's the reason we hide underneath the cover  
Skinheads dressed to kill  
Fear makes our eyes locked  
We don't see what we see, nothing will ever change  
Human refuse, nuclear fission, ozone perforation,  
radiation  
Plutonium, dioxines, mercury  
All these things will destroy our world  
But we use it and don't care
