

Starting Tuesday "Everything"

Visit "[Everything](#)" on MotoLyrics.com

Close your eyes and see my face
Everywhere in this space
Cause You know that I love you
And I won't let go

I closed my eyes, and I fell in
To meet you here, but you were already gone
You left me, I lost you
And I let you go

I just want you to notice
I just want you to feel the same
I just want you to notice
That I just want to be your everything

When I close my eyes I'm afraid
That now I am what you were once to me
And it's hard being here
And I see now I hurt you

I want you to love me now
The way you loved me then
I want to be for you
What I have never been
