If it makes any difference
And I'm sure that it won't
If you think I laugh and take it light
You're wrong this time I don't

Look at me if you're still looking
For the place the blame should fall
I'm sick and simply sorry
If it makes any difference at all.

Chorus:
If it makes any difference
About me and you
If it makes any difference
Anymore what'll I do
Knowing how I made you feel it's plain
Feel about so tall
I'm sorry and I love you
If it makes any difference at all.

If it makes any difference
I was wrong from the start
These aren't just sweet talking words
These are from the heart.

I've walked around the truth before
But this time I'm ready to crawl
What else can I say but I'm sorry
If it makes any difference at all.

I'm sorry and I love you
If it makes any difference at all..
