Five warriors raise their steel  
We are free no longer sealed  
We arise with a different face  
In the darkness  
Far away from grace

Don't hide yourself show them who you are  
Cause we got the curse  
We love the sound from the swords of steel  
And our souls will be healed

In the storm we will arise  
High in the sky  
Never surrender  
In the storm we will arise  
Until the end

Bounded to the metal scene  
More secure than we ever been  
United we are strong and brave  
The metal world  
We will save

Don't hide yourself show them who you are...

In the storm we will arise...

Don't hide yourself show them who you are...

In the storm we will arise...
