[Bonus track]

Good and evil
The battle rages on
We're all sinners
God's creations
Cu'z somewhere somehow on the path of life
We are forced into false directions

[CHORUS]

I am not afraid no more
For my sins I will die
I am not afraid no more

Through this endless waste
I'm bound to fly
A tranquil moment to ease
I hope in heaven I won't be denied
A solace to my grief

[CHORUS]

No matter what
You can't undo what is done
It's all written down in the book of past, forever
Tell me, tell me, tell me why it has to be this way
Set us free, just let us be!
To avoid your fall

[CHORUS]
