Fight, fight tooth and nail

Fight, fight tooth and nail

It's the law of the jungle

The strongest will survive

And that's the rule I live by

Think fast and stay alive

Keep the eye of the tiger

Gather cunning, strength and speed

Use every trick you know

Don't retreat until you bleed

Your hand's a deadly weapon

Your teeth can rip in two

Get 'em before they get you

There's no time to lose

Fight, fight tooth and nail

If you think they'll show you mercy

You better think again

You gotta fight

I'm akin to the lion

The tiger and the bear

I use what nature gives me

To rip and slash and tear
I'm really very gentle
Rather make love than go to war
But if you try to harm me
You'll die by nature's law
My hand's a deadly weapon
My teeth can rip in two
A present of death I'll give you
I'll run you through and through
Fight, fight tooth and nail
If you think they'll show you mercy
You better think again
You gotta fight
Once more into the cobra's nest
A poisoned victory
Blood stains the sands of history
If you wage war
You'll get no pity from me
