You tell me to cut my hair and get a job  
Fancy clothes, polite friends and finally grow up  
(LISTEN)  
I will live my life my way and take it day by day  
And I won't change a single thing, not matter what you  
say

Don't you stop  
Drink until you drop  
Hear our call  
Together we drink, united we fall

You will find me, yes you'll find me...

Hammered and down  
Hammered and down  
Hammered and down

If you feel like we do, our Metal's just for you  
Won't spare a single beer 'cause we're the drinking  
crew (and if)  
You're addicted to school stuff and haven't changed in  
years  
You're the keepers of the faith, to you we raise your  
beers

Beer's up high  
Drink until you die  
Bang your head  
Don't you stop until you're dead

Till they find you, they'll find you...
