Child of my body  
My child, my child my son  
You are like your mother  
You are, you are like no one

Hearts move in all directions  
Always reaching reaching to the sun  
Where, where have you flown to  
My angel, my angel my son  
Fly to the heavens  
Onward you go  
All the stars and rainbows  
Your secrets yet to unfold

Child of my body  
Child, child of my soul  
You are like your mother  
You are, you are like no one

Take heart in knowing  
You came with all you need  
Trust in your being  
The life you have seen

Child of my body  
Child of my soul  
Child, child of my body

Child, child, child, child of my soul
