"Someone"

Visit "[Someone](#)" on MotoLyrics.com

Oh I need someone to help me get over someone
To help me get over someone who got over me
Oh I need someone to kiss and make it all better
To put my poor heart back together
Ooh would you help me please

When love walked out of my life I thought I'd lost
everything
But I find I'm wasting my time living in the past
I gotta find somebody new and fast
I need someone to help me...

It tears me up love is so tragic
Gotta find someone who can make it magic
I need someone to help me...
Oh I need someone to help me...
