

Stepa "Watching You"

Visit "[Watching You](#)" on MotoLyrics.com

It's been a long time since I could touch you
And all I can do is just watch you
Sit at the other end of the room
Staring in confusion, what did I ever do

And now I'm watching you
Craving your love for just one day
And I'll just watch you
Every night that I lay
And I'll always be watching you
Since the day I lost you
And now I'm watching you
Forever and ever, watching you

Will I ever know why you left me
Will I ever be able to touch you again
I do not have any answers
But I need them and I need to know when

Chorus

I have now realised that I love you
And I also really need you

Chorus
