

Stepa "What You See"

Visit "[What You See](#)" on MotoLyrics.com

Baby, I've got something on my mind
Well, it's been there for a while
I just really need to know
If I'm wasting my time
I also wanna know something else
It's been bugging for quite some time now
I just wanna know
Do you love me

Am I really the one that you need
Have you ever truly cried for me
When you touch me
Do you see me, do you need me, do you want me
Has there ever been somebody else
When you were all alone and by yourself
Have you ever forgot my name
Tell me

What you see, what you see, what you see
Is it me
What you see, what you see, what you see
Is it me
I love you, can't you see
That you need to be with me
I love you, can't you see
That you need to be with me

Is there something you're hiding from me
Is there someone else I do not see
When you see me
Do you see me, do you need me, do you want me
Have you changed yourself in any way
Should I stop loving you from today
I need to know

Chorus
