I'm up in the morning  
Get ready for the day to come  
I can hear the door ring  
My friends are here to have some fun  
I'm always last to get ready  
But keep it slow and go steady  
You know I'm always fixing my hair up  
But that's one thing and that's my luck

I love the morning most of all  
But it's much better when someone calls  
Cos I just love spending all my time  
With some red lipstick and my smile

My friends took me out later that night  
And everything was going right  
I met this boy I really liked  
And my whole body felt so light  
We danced all night and we shopped all day  
Now I'm off my feet and I've got my way

Chorus
