Don't leave me alone here, this place is much too hard
Don't leave me alone here or I will break apart
If I follow you, it will be the same
But Babe let me choose, let me choose my pain

I believe every lie when it comes right out of your
mouth
So give me just some more pretty lies
Let them fly out of your pretty mouth
But Babe - Save me, help me in, there's blood on your
hands
But I don't want to know where you've been

When I'm with you, I'm losing blood
When I'm far away from you, I lose myself

I believe every lie when it comes right out of your
mouth
So give me just some more pretty lies
Let them fly out of your pretty mouth
But Babe - Save me, help me in, there's blood on your
hands
But I don't want to know where you've been

So let me follow you, everywhere you go
Give me just some more pretty lies, open your mouth
and let it flow

I believe every lie when it comes right out of your
mouth
So give me just some more pretty lies
Let them fly out of your pretty mouth
But Babe - Save me, help me in, there's blood on your
hands
But I don't want to know where you've been.
